

# THE CALIFORNIA PHENOLOGY

PROJECT

*Tracking plants and animals through the seasons to study climate change*

**Join the coordinators of the California Phenology Project for an evening lecture with the California Native Plant Society**

**First United Methodist Church**

*Tuesday December 11 | 7:30pm – 9pm | 1008 11<sup>th</sup> Street • Santa Monica*

- **Presentation followed by question and answer session**
- **Learn how the seasonal activities of plants and animals are linked with climate change**
- **Get informed about how scientists, educators, and the public are working together across the country – and throughout California – to track plant and animal phenology**
- **Find out how the CNPS and *you* can contribute to this important effort from your backyard, schoolyard, open spaces, California's National Parks, and the UC Natural Reserve System**

*The presenters are research scientists at UC Santa Barbara. They deliver engaging lectures and phenology training workshops for scientists, educators, and the public in their efforts to coordinate the California Phenology Project. Come learn what's happening in your region.*

**Brian Haggerty, M.S.**  
*UCSB PhD student*

**Dr. Liz Matthews**  
*UCSB Post-Doctoral  
associate*

**Dr. Susan Mazer**  
*UCSB Professor of  
Ecology & Evolution*

**Join the presenters for a  
phenology field  
workshop!**

**UCLA Stunt Ranch Santa  
Monica Mountains Reserve**  
*(UC Natural Reserve System)*

**Saturday December 15**

**10am – 2pm**

**Details for this free event will be  
provided at the Tuesday evening  
lecture, or email the presenters  
for details and to RSVP:**
